## Venue Overview & Concept

Upstairs @ the Gellions is a 100-120 capacity venue above the Gellions bar in Inverness city centre.

Our primary focus is to provide a platform for electronic and alternative music to be performed and reproduced to the highest standard ensuring that the audience is given an unrivalled and unforgettable experience.

We are willing to accommodate productions where additional equipment is required, however we hope that this technical spec will help to reduce any requirement for this as the venue is only accessible via two awkward narrow staircases.

## Detailed Specification Sound

### Sound System

Upstairs has a FOH system comprising two Nexo PS15s supported by two double 18" subwoofers. It can deliver in excess of 105db SPL across the audible bandwidth at the FOH mix position without distortion.

The system is driven by 3 amplifiers and includes a system controller which takes care of crossover, equalisation, delay processing and system protection.

### Booth Monitors

We have 2x Coaxially loaded 12" powered wedge monitors mounted on speaker stands offering a stereo booth monitor system for DJ use.

### Power

For DJ setups we have 12x 13a sockets spread across the booth.

## Detailed Specification Lighting

### Lighting

The venue lighting is distributed across 8 internally wired bars. This set up makes it possible for the lighting rig to be easily reconfigured and augmented depending on the requirements of the visiting production.

Each bar has a total of 6 power outlets, 2x 16A ceeform and 4x IEC. Adapters to other types of power connector can be made available on request.

Each LX bar has a separate DMX feed from our active DMX splitter. We have spare outlets from this which are available for floor packages.

Our in house multicore can run ARCnet over CAT5 or up to 4x DMX universes over 3 pin DMX lines.

We have a video wall measuring 3m x 2m across the back wall of the stage. This is constructed from 3 Martin LC2140 panels. This is suitable for low resolution content controlled through Resolume Arena.

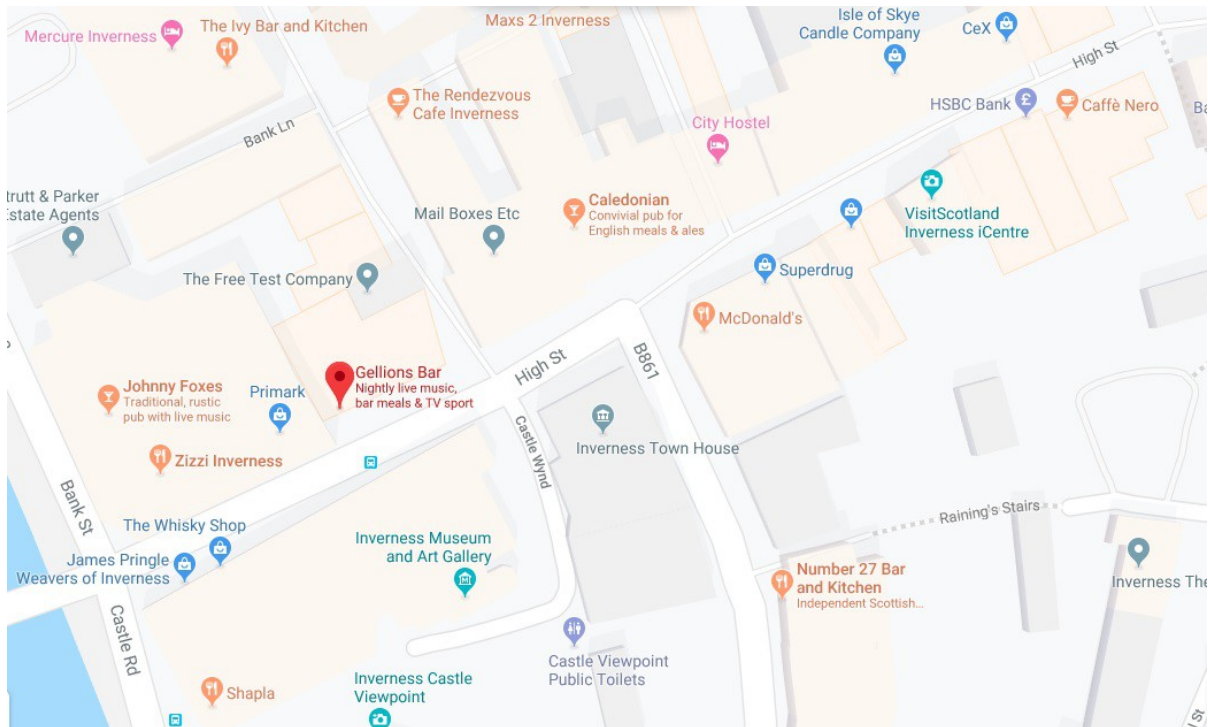

## Contact & Location

For more information or if you have any technical questions please contact:

Adam Fairbairn on 07763126304 or  
email : [adamfairbairn@hotmail.com](mailto:adamfairbairn@hotmail.com)

Upstairs is located in the City centre on Bridge Street with a number of popular shops and restaurants near by.
